

THINGIQ  
SOLUTIONS

Residential & Commercial Automation

# What is automation?

Automation is connecting all the functional elements of your environment (home, office or hotel) to a network and putting it to work for you.

# Automation Solutions by ThingIQ

# Intelligent Lighting

*Create your own Ambience!*

Brighten or dim any light in the room - or the entire house - with a single touch. Or allow lighting to respond to your life, without any touch at all.

Choose from millions of colours to set the perfect lighting according to your mood or time of day.

Smart lighting provides convenience, energy efficiency and added security.

# Climate Control

*Spin up comfort!*

Control living space environment through smooth fan dimming or seamless HVAC integration.

Monitor the ambient temperature and set the room temperature based on climate conditions for optimum energy usage.

User intuitive control through smart touch panels, mobile app or voice assistants such as Alexa or Google Home.

# Smart Entertainment

*Life of the party!*

Put music and video at your command from your favourite devices.

Stream high-fidelity sound to every room in the house. Play high-definition video from virtually any source on any TV.

Enjoy your personal music collection stored on your smartphone or stream services like Spotify and thousands of free internet radio stations.

# Security Systems

*Your guardian eyes!*

Don't let any unwanted movement go unnoticed, with our forever alert sensors and alarms.

Smart sensors detect movement, temperature, light levels, humidity, cooking gas, CO2 to keep your family safe in any circumstances.

Integrated CCTV camera feeds in your mobile app, so you get a real-time stream whenever you want.

# Access Anywhere

*Control at your fingertips!*

With our intuitive mobile application, monitor your premises or control any appliance from across the globe.

Open doors remotely for visitors, monitor thorough cameras and get alerts for any attempted break-ins.

The applications are a charm to use. You can set your favourite scenes, device shortcuts and get used to the control in no time.

# Voice Assistants

*Your word is my command!*

Introducing the simplest way to control your entire house  
- Your Voice.

*"Alexa, turn on Welcome"*

Light up the living room, fires up your favourite Spotify playlist, while the door locks itself behind you.

Seamlessly integration with major voice assistants, i.e.  
Alexa, Google Home or Siri for voice control.
